

# Power Press Release

## ALPHA ENERGY TO PRESENT SOLAR POWER AT TECHNOLOGY ALLIANCE GROUP LUNCHEON

**Bellingham, Wash., May 15, 2009** – A national leader in turnkey photovoltaic systems, and member of The Alpha Group, Alpha Energy will present the practical business applications of renewable energy at the May 15 luncheon at Technology Alliance Group for Northwest Washington.

Alpha Energy President, Drew Zogby will discuss the important role that renewable energy and sustainable powering techniques are playing in today's business world. From current government incentives and diverse financing options to the difference between economic and ecological payoffs, Zogby will provide a basic overview of solar power systems and the practical applications to businesses and everyday life. His presentation will include an overview of Alpha's off-grid Hybrid Solar Power Plants, Grid-Tied Solar Shade Structures and Electric Vehicle Chargers.

For more information or to attend the luncheon, registration is available from the Technology Alliance Group for Northwest Washington web site.

**Technology Alliance Group for Northwest Washington** connects technology businesses to resources by offering educational programs, networking opportunities and other business services to the technology sector and its service providers. Our mission is to promote, educate, and advocate for technology businesses in Whatcom, Skagit, Island and San Juan counties to help accelerate the development and growth of innovation driven, technology-based industries in the region.

**Alpha Energy**, a member of The Alpha Group and a division of Alpha Technologies, is a full-service engineering and project development company for the distributed generation power industry. One of the nation's leading developers of turnkey photovoltaic systems for commercial, residential, institutional and remote (off-grid) applications, Alpha Energy is recognized as a market innovator in packaging renewable energy technologies.

**The Alpha Group** represents a global alliance of independent companies that share a common philosophy – create world-class powering solutions for communication, commercial, industrial and renewable energy markets.
