ALPHA ENERGY COMMISSIONS GRID-TIED SYSTEM FOR COX IN TUCSON

Phoenix, Ariz., March 10, 2010 – Located at 1628 West Williams Drive, Alpha Energy, a member of Total Power Solutions provider The Alpha Group, recently completed the construction and commissioning of a 21kW Elevated Solar PV Grid-Tied structure for Cox Communications in Tucson, AZ.

“This commercial solar installation is a continuation of the partnership between Alpha and Cox to support Cox leadership in solar energy deployments in this region,” said Drew Zogby, President and COO of Alpha. “Cox Communications is known for its sustainability programs, including ‘Cox Conserves’, and we are proud to play a role in their efforts by providing cost-effective and efficient renewable energy systems that have a tangible, positive effect on their operations and their community.”

As one of three solar power installations commissioned at Cox Arizona locations so far this year, the 21kW Tucson system consists of 120 photovoltaic panels supported by an Elevated Solar Racking structure that was designed and installed by Alpha, covering 18 parking spots. The system will generate more than 32,000 kilowatt hours per year, enough to power about 3 homes. All PV systems deployed by Cox AZ include real-time performance monitoring systems that track and record performance data including power produced and metrics to energy offsets.

“For Cox, going solar is all about the bottom line in terms of economics AND community impact,” said Lisa Lovallo, Cox’s vice president for Southern Arizona. “We are a local company making businesses decisions that benefit our customers, our employees and the community. We partnered with Alpha – an Arizona company - because they have the experience and expertise to build a solar structure that would help us save money and reduce emissions here in our community.”

Cox Communications, a wholly owned subsidiary of Cox Enterprises, is a multi-service broadband communications and entertainment company with more than 6 million total residential and commercial customers. The third-largest cable television company in the United States, Cox offers an array of advanced digital video, high-speed Internet and telephony services over its own nationwide IP network, as well as integrated wireless services in partnership with Sprint.

Alpha Energy, is a full-service engineering and project development company for turnkey renewable energy technologies and photovoltaic (PV) systems for commercial, institutional and remote (off-grid) applications. Alpha Energy is a division of Alpha Technologies, a world leading **Total Power Solutions** provider for more than thirty years. Stop by our Phoenix office on 1628 West Williams Drive or contact us at 602 997 1007. Alpha Energy is a member of The Alpha Group.

The Alpha Group represents a global alliance of independent companies that share a common philosophy - create world-class **Total Power Solutions** for communication, commercial, industrial and renewable energy markets.
