

Power

PWE PHSD Series

PWE High Security Device

- High visibility provides excellent theft deterrent
- Compatible with PWE: 3, 6 and 9 battery enclosures
- Corrosion resistant to provide years of use in a variety of adverse environments
- Unique locking system prohibits access to (Vulnerable) padlock shackle

Alpha now offers the PWE High Security Device (PHSD) to help secure the PWE enclosures in environments where component theft is problematic. The PHSD is constructed of high grade stainless steel to provide physical security, corrosion resistance, and a strong visible deterrence. The PHSD is compatible with Alpha's PWE enclosures including; PWE 3, 6, and 9. 304 grade stainless steel construction provides uncommon strength and durability.
