

ALPHA EXHIBITS AT THE 2009 RENEWABLE ENERGY WORLD EXPO

Bellingham, Wash., March 17, 2009 - National leader in turnkey photovoltaic systems, and member of The Alpha Group, Alpha Energy was pleased to participate in the Renewable Energy World Conference and Expo in Las Vegas, March 10-12.

“The Renewable Energy World show is consistently a strong show for us,” said Dave Frankenfield, Vice President of Sales at Alpha Energy. “It’s an opportunity for us to check out the industry and build partnerships at the same time that we promote the growth of the new renewable energy power grid. This year, the attendee energy level at the show was higher than expected. Customers were excited to talk about new government incentives, reducing dependency on foreign oil, minimizing carbon foot prints and, increasingly, the growth of green collar jobs.”

Featured products for Alpha Energy included:

- **AC/DC Hybrid Solar Power Plant:** A highly configurable power plant ideal for telecommunications providers, security, military and pipeline companies who require the benefits and security of solar electricity in mission critical powering applications.
- **Solar Shade Parking Structures:** Parking canopies with a roof specifically designed to provide low-cost support for a solar power system.
- **EV-500 Electric Vehicle Charger:** A stand-alone solution designed to charge electric vehicles.
- **AlphaRac™ Battery Racks:** Specifically designed for the industrial market, these customizable battery racks can accommodate stationary battery models of all types.

Alpha Energy, a member of The Alpha Group and a division of Alpha Technologies, is a full-service engineering and project development company for the distributed generation power industry. One of the nation’s leading developers of turnkey photovoltaic systems for commercial, residential, institutional and remote (off-grid) applications, Alpha Energy is recognized as a market innovator in packaging renewable energy technologies.

The Alpha Group represents a global alliance of independent companies that share a common philosophy – create world-class powering solutions for communication, commercial, industrial and renewable energy markets.
