ALPHA ENERGY FEATURES SOLAR DEEP CYCLE BATTERIES AT THE SOLAR SHOW

Bellingham, Wash., October 28, 2009 – A national leader in turnkey photovoltaic systems and member of The Alpha Group, Alpha Energy is proud to feature its new line of Solar Deep Cycle batteries at the 2009 Solar Power International Expo in Anaheim. AlphaCell™ IGL Solar Gel batteries are based on Gel technology to provide extended battery life in outdoor applications.

“Adding batteries to a renewable energy system expands your options and can ensure you have power after the sun goes down,” said Drew Zogby, President and COO of Alpha Technologies. “Our IGL Solar Gel batteries are designed specifically for renewable energy applications that require frequent cycling. Our Hybrid Power Supply systems are engineered to use solar or wind power to charge the batteries in preparation for low renewable energy generation periods. In mission critical situations where consistent power is a requirement, IGL deep cycle solar batteries provide a buffer to keep your systems operating.”

Designed for easy integration, AlphaCell IGL batteries come ready to support your system right out of the box. Featuring an industry-leading warranty, durable Silver Alloy composition, increased runtime and maintenance-free threaded inserts, IGL batteries provide optimum performance in grid-tied and off-grid renewable energy applications.

- Thixotropic Gel provides high performance thermal dissipation to limit corrosion.
- Advanced-Design Internal Plate formation helps to extend long-term runtime performance.
- Fiberglass backed separator with EdgeGuard wrap prevents electrical shorts to maximize life expectancy.
- Maintenance-free sealed construction requires no periodic watering and is safe for all forms of transport.

Please join us at booth 2320 at the 2009 Solar Power International show in Anaheim, CA, October 27-29 to learn more about these and other Alpha Energy innovations.

Alpha Energy, a member of The Alpha Group and a division of Alpha Technologies, is a full-service engineering and project development company for the distributed generation power industry. One of the nation’s leading developers of turnkey photovoltaic systems for commercial, residential, institutional and remote (off-grid) applications, Alpha Energy is recognized as a market innovator in packaging renewable energy technologies.

The Alpha Group represents a global alliance of independent companies that share a common philosophy – create world-class powering solutions for communication, commercial, industrial and renewable energy markets.
