## Tempest Te20

Power Enclosure

Tempest Te20

- Available in 24 and 48VDC, 1200A
- Designed for outdoor wireless market requirements
- Air conditioned battery and customer equipment compartment
- Fan cooled DC power equipment compartment
- NEMA 3R rating
- Compatible with base mounting and cable interface

**Tempest brings versatility to outdoor power systems for wireless market requirements.** The Tempest Te20 power enclosure is designed to provide additional power for BTS and UMTS equipment either as upgrade equipment or for new site installations. The Te20 has a robust back-up power system and is built with lightweight durable aluminium construction that withstands severe environmental conditions.

The Te20 provides a separate power compartment for batteries or customer equipment. Air conditioning maintains long battery life and stable temperature conditions for customer equipment. Power equipment is hardened to 65°C (149°F) requiring only fan cooling to maintain stable operation in all ambient environmental conditions.
