Top Terminal

- 10-year design life batteries with front or top terminals
- High rate flame retardant AGM UPS batteries for all standby applications

Alpha's Headend battery line includes three distinct types of models: 20-year batteries, 10-year telecom front and top terminal, and flame retardant UPS batteries. These batteries provide improved performance, longer runtimes and extended service life. The front terminal models allow for easier access to the batteries during installation and routine maintenance. Alpha's Headend batteries are ideal for broadband, cellular, electric utility, PCS, customer premise, long distance and distributed power.
