# APP

## Node Optimization Power Supply

- Portable node optimization power supply
- Time-proven ferroresonant technology
- Dual outputs with auto seize mechanism
- Agency certified NEMA3R

**The APP is a portable non-standby node optimization power supply used to provide conditioned AC power to a remote PHY unit for up to 8 hours while the node is being optimized on site prior to connecting it to the network and carrying traffic.**

The APP uses a 5 foot 120VAC 15A line cord for input power, which is intended to be via portable generator\* (Honda EU2200 recommended). Dual coax connectors are provided for 90VAC output.

\*Node input circuit protection must be provided.
