

Precast Pads for Powernode Enclosures

Alpha offers a line of precast, polymer concrete pads for most Alpha Enclosures including AlphaGen™ generator systems. All precast pads include 3/8" Stainless steel mounting hardware to ease field installation.

Polymer Concrete (PCC): These pads are yellow-brown in color and have a nonskid surface surrounding the enclosure area. Polyester polymer concrete consists of polyester resin binder reinforced by mineral aggregates and fillers.

Precast Concrete (PCD): Precast concrete pads are a composite of high-strength fiber-cement and lightweight concrete, cast and cured into a monolithic slab and are further reinforced with galvanized, high-strength steel truss wire.
